

# Asking Questions and Defining Problems

## What does it look like?

Students developing the ability to formulate testable questions as they observe the world around them.

Progression through the Grades: Students at all grade levels should be able to ask questions related to the observations they make about the world. As they move from one grade to the next these should become more complex and defined, seeking to challenge or clarify previous thought.

## MY NASA DATA Lessons

## Seasonal Cloud Cover Variations (Grades 9-12)
