My NASA Data - Lesson Plans

Data Literacy Cube: Graph Data with Antarctic's Contribution to Sea Level Rise Graph

Overview

Use the Data Literacy Cubes to guide students’ exploration of data to enrich their observations and inferences. This is a flexible resource that may be used with a variety of graphical representations of data. This activity requires a graph for students to evaluate.

Learning Objectives

- observe and interpret physical characteristics of the Earth System using graphs of NASA data
- write a claim about the variables in the graph
- analyze how the phenomena changes of time and space
- characterize the independent and dependent variables
- brainstorm the phenomena connects to other parts of the Earth System
**Essential Questions**

- How are the data represented in the graph?
- How do we identify a change in these data?
- How does a change in the independent variable affect the other variable?
- What relationship do you claim exists among these variables?

**Materials Required**

- 1 Graph Cube per group/student (or die)
- 1 differentiated Graph Cube Question Sheet per student
- 1 sheet of paper per student
- Pencil
- Graph (as a handout or projected on the screen)

**Teacher Preparation:**

Print copies of the cube on cardstock and cut out. Assemble the cube with glue. Note: consider laminating after you cut these out for multiple uses. (Gaming dice may be substituted for the cubes.) Also, print off copies of the differentiated Graph Cube Questions. Distribute to students for group or independent work.

**Technology Requirements**

- Standalone Lesson (no technology required)

**Teacher Background Information**

For more information about the procedures for accessing MND data on the Earth System Data Explorer, visit our [YouTube page](#) and watch the tutorials.

**Procedure**

1. Distribute one Graph Cube per group (or die), as well as the related Graph Cube Questions sheets and the graph.
2. Students roll the cube and find the matching question on the Graph Cube Question sheet.
3. Answer one question found under matching question on a sheet of paper, labeling the question with the number and letter of the question.
4. Repeat Steps 2-4 until at least 10 are answered.
Graph Cube

1. Examine the graph.
   A. The title tells me ____________
   B. The bottom of the graph is the ___ axis. The variable is ____________
   C. The left side of the graph is the ___ axis. The variable is ____________
   D. The time frame for the data is ____________ to ____________

2. Summarize the graph.
   A. The x axis shows the (independent/dependent) variable.
   B. The y axis shows the (independent/dependent) variable.
   C. The data _______ increase/decrease/follow a pattern. Explain.

3. Analyze the graph.
   A. ____________, caused the change.
   B. The variable that changed as a result of something else changing is ____________
   C. If ___ increases/decreases/stays the same, then _______ increases/decreases/stays the same.
   D. The numbers on the graph show ____________

4. Brainstorm a question that you can answer using these data.
   A. How does...?
   B. I wonder...
   C. How is _______ the same as _______? Different from _______?
   D. How many _______?

5. Who would be interested in this graph?
   A. I think ____________ (e.g., farmers, snow-skiers, etc.) would be interested in this graph.
   B. These data are important to the _______ community because ____________

6. Assess the data values.
   A. The label on the x axis is ____________ The label on the y axis is ____________
   B. The unit for the x axis is ____________ The unit for the y axis is ____________
   C. The scale for the x axis is ____________ The scale for the y axis is ____________

Graph Cube Questions

1. Examine the graph.
   A. The variable on the x-axis is ______. It is the (independent/dependent) variable.
   B. The variable on the y-axis is ______. It is the (independent/dependent) variable.
   C. The value of the independent variable affects the dependent variable by ______.

2. Summarize the graph.
   A. The variable that changes as a result of another variable changing is ______.
   B. The variable that causes the change is ______.
   C. As the independent variable ______ (increases/decreases), the dependent variable ______ (increases/decreases/stays the same).
   D. The time frame represented in the graph is from ______ to ______.
   E. The data ______ (increase/decrease/in no pattern). Explain ______.

3. Analyze the graph.
   A. Write a hypothesis about the two variables to explain the graph. If ______, then ______.
   B. The quantitative evidence that supports my testable statement is ______.

4. Brainstorm a question that you can answer using these data.
   A. How does ______? How many ______?
   B. I wonder ______. How is ______ the same as ______? Different from ______?

5. Who would be interested in this graph?
   A. I think ______ (e.g., farmers, snow skiers, etc.) would be interested in this graph.
   B. These data are important to the ______ community because ______.

6. Assess the data values.
   A. The label on the x-axis is ______. The label on the y-axis is ______.
   B. The unit for the x-axis is ______. The unit for the y-axis is ______.
   C. The scale for the x-axis is ______. The scale for the y-axis is ______.
Graph Cube Questions

1. Examine the graph.
   A. The bottom of the graph is the ____ axis. The variable is _____.
   B. The left side of the graph is the ____ axis. The variable is _____.
   C. The time frame for the data is ____ to ________.
   D. The title says _______. It means _______.

2. Summarize the graph.
   A. The x-axis shows the (independent/dependent) variable.
   B. The y-axis shows the (independent/dependent) variable.
   C. The data _____. Describe a pattern. I know this because _____.

3. Analyze the graph.
   A. The independent variable, ________, caused the change.
   B. The dependent variable _______ changes when the independent variable changes.
   C. If _____. Describe a pattern. I know this because _______.
   D. The numbers on the graph show _______.

4. Brainstorm a question that you can answer using these data.
   A. How does ____? I wonder ______?
   B. How is _______ the same as ____? Different from _______?
   C. If _______ then _______.

5. Who would be interested in this graph?
   A. I think _____ (e.g., farmers, snow skiers, etc.) would be interested in this graph.
   B. These data are important to the _____ community because _______.

6. Assess the data values.
   A. The label on the x-axis is _______. The unit on the y-axis is _______.
   B. The unit for the x-axis is _______. The unit for the y-axis is _______.
   C. The scale for the x-axis is _______. The scale for the y-axis is _______.
