
My NASA Data - Mini Lesson/Activity

Kuril Islands Volcanoes

Student Directions

Steps

1. Examine the images to complete a graphic organizer and answer questions. Check with your instructor on how to submit answers.

[Sarychev Eruption June 12,2009](#)

2. Examine the image snapped from the International Space Station of the [Sarychev Volcano](#) in the Kuril Islands which are northeast of Japan. It is a photo of an early stage of eruption on June 12, 2009.

[My NASA Data](#)

[Earth System Graphic Organizer](#)

https://mynasadata.larc.nasa.gov/sites/default/files/2019-08/Earth%20System%20Frayer%20Model%20V.5_Graphic%20Organizer.pdf

3. Describe the impact you think the eruption could have on the Earth spheres: Atmosphere (air), Biosphere (living things), Cryosphere (ice and snow), Geosphere (land and soil), and Hydrosphere (water). Use the [graphic organizer provided](#). NOTE: You will be filling it in for another image as well. Plan to use a different color or font to tell them apart.

[Raikoke](#)

[Eruption June 22, 2019](#)

https://mynasadata.larc.nasa.gov/sites/default/files/inline-images/Raikoke_1.jpg

4. Now, examine the image (also taken from the International Space Station) of the [Raikoke Volcano](#), also in the Kuril Islands. This eruption occurred on June 22, 2019.
5. Describe the impact you think the eruption could have on the Earth spheres: Atmosphere (air), Biosphere (living things), Cryosphere (ice and snow), Geosphere (land and soil), and Hydrosphere (water). Use the same graphic organizer provided. Record your observations for

the new volcano in a different font or a different color.

6. Compare the two images and use your graphic organizer to answer the following questions.

Sarychev Eruption June 12, 2009 - Image Credit: NASA

Raikoke Eruption June 22, 2019 - Image Credit: NASA

[Sarychev Eruption June 12, 2009 and Raikoke Eruption June 22, 2019](#)

[Image Credits: NASA](#)

https://mydas.nasa.gov/sites/default/files/inline-images/Compare%20Sarychev%20and%20Raikoke_1.png

1. Compare the [two images](#). What are the similarities and differences in the images?
2. The volcanoes happened approximately 30 km apart. What does this tell you about the area?
3. Make a claim about the volcanoes in the area. Use the evidence from the images and give your reasoning.
