## **My NASA Data - Mini Lesson/Activity**

### **Illustrate Your Inner "STEM Explorer"**

#### **Grade Band**

- 3-5

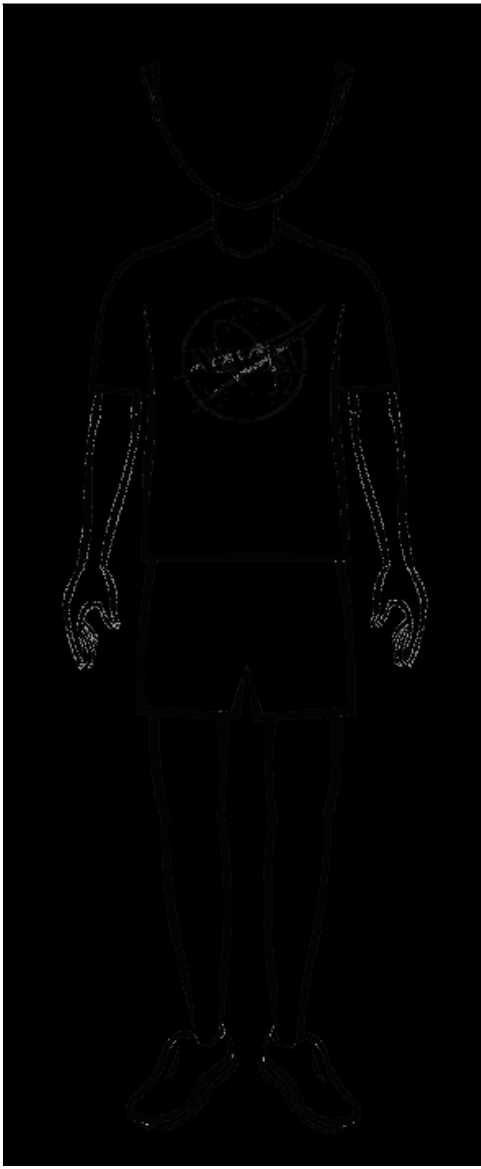

#### **Time**

- 30 minutes

#### **Overview**

Help learners envision themselves as explorers, scientists, technologists, engineers, and mathematicians as they venture into the summer months. Download the PDF of the two sided document on cardstock and have students imagine and illustrate themselves!

#### **Student Directions**

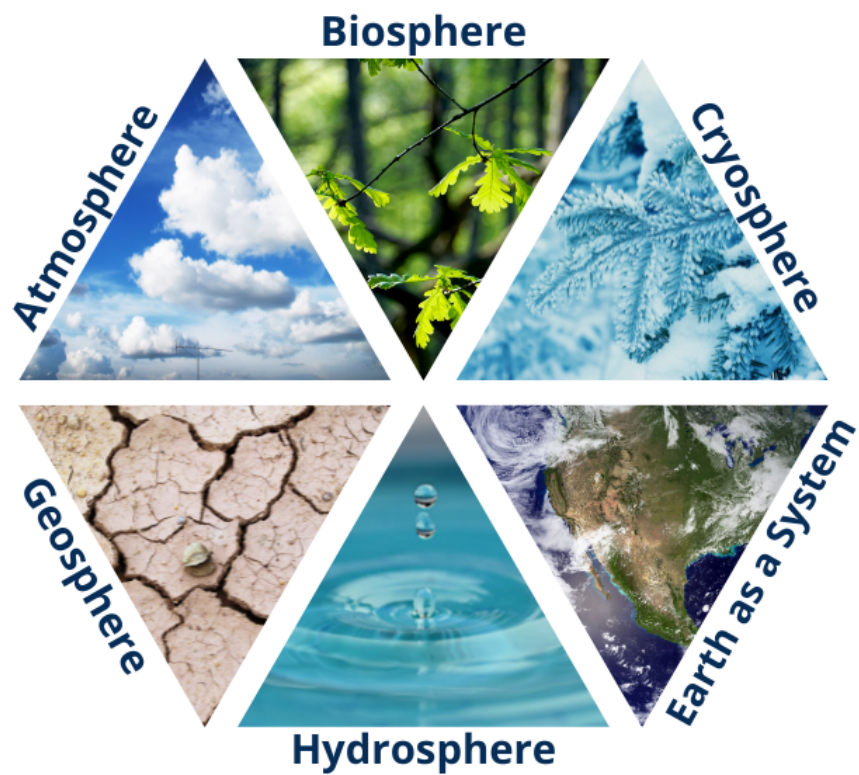

*When NASA goes to camp, your Inner STEM Explorer will want to be there, too.*

Help learners envision themselves as explorers, scientists, technologists, engineers, and mathematicians as they venture into the summer months. Download the PDF of the two-sided document on cardstock and have students imagine and illustrate themselves!

---

Challenge the learners to locate different parts of the Earth System and take "selfies" of their Mini-Me's with these as they explore the parks, even their Granny's back yard! Encourage students to submit their "selfies" of their Inner STEM Explorers to [larc-mynasadata@mail.nasa.gov](mailto:larc-mynasadata@mail.nasa.gov) to enter to have their illustrations featured here!

Consider using this activity with the *Awenasa Goes to Camp* lessons. See below for more details!
