# **My NASA Data - Interactive Models**

### **Interactive Weather Observations**

This lesson is modified from the original Elementary GLOBE Learning Activity Weather Adds Up to Climate created by the UCAR Center for Science Education. The learning activity has more detail and additional components which may be of interest. The paper version of the bar charts are from the original activity.

These slides are made to be used in *edit* mode so that items can be dragged and dropped. Do NOT use presentation mode.

Teachers who are interested in receiving the answer key, please complete the <u>Teacher Key Request</u> and <u>Verification Form</u>. We verify that requestors are teachers prior to sending access to the answer keys as we've had many students try to pass as teachers to gain access.

#### **Grade Band**

• 3-5

## **Supported NGSS Performance Expectations**

• 3-ESS2-1: Represent data in tables and graphical displays to describe typical weather conditions expected during a particular season.
