Discovering Data with NASA Scientists: Desiray Wilson

NASA Connections

The "A Data Visualization Experience" (ADVizE) videos series is a set of a six videos created for you to see how NASA scientists work with data.

The videos can be used to demonstrate how there are many aspects of working with data. This set of the six-series videos can help teachers and students understand how scientists think about and use data. Each video addresses a question that was given to a Subject Matter Expert.

This video addresses the following question: "We know that there are a number of ways that data can be visualized. Would you please describe your process for looking at the same data as represented by different graph types and how this helps inform your meaning making from the data?"
