# Discovering Data with NASA Scientists: Dr. Shahryar Ahmad

## NASA Connections

The "A Data Visualization Experience" (ADVizE) videos series is a set of a six videos created for you to see how NASA scientists work with data.

The videos can be used to demonstrate how there are many aspects of working with data. This set of the six-series videos can help teachers and students understand how scientists think about and use data. Each video addresses a question that was given to a Subject Matter Expert.

This video addresses the following question: "As you think about how you use data visualization(s) to communicate your findings with others, can you describe how you refine the visualization(s) that you present to better support the story that you are sharing with the data visualization?"
